Computer Engineering Student | Focus: Backend Development & DevOps

OBJECTIVE

6th-semester Computer Engineering student at COMSATS University with broad exposure across backend development, DevOps, databases and cloud technologies. Eager to join an engineering team as an intern to move from exploring to actually building, get real feedback, and develop genuine expertise through hands-on work.

EXPERIENCE

Innovative Saudia Jul 2025 – Aug 2025
Backend Engineer Intern *Lahore*
[View Daily Progress Log]

- Learned backend and DevOps practices under the guidance of experienced professionals.
- Documented daily progress and key learnings to track skill growth.
- Prepared for the AWS Cloud Practitioner certification, completing multiple mock tests.

EDUCATION

COMSATS University Islamabad, Lahore Campus 2023 – 2027
Bachelor of Computer Engineering *Lahore*
CGPA: 3.6/4.0 | 6th Semester

PROJECTS

AI-Powered Event-Driven Medical Image Processing System for Cancer Cell Detection [GitHub Link]

- Developed a distributed event-driven microservices application for detection and analysis of cancer cells in medical images.
- Built the complete end-to-end pipeline including image upload, preprocessing, deep learning inference, and result processing, fully containerized with Docker.
- Integrated Ollama LLM on cloud and built an AI chatbot for interactive medical image analysis and query support.
- **Tech stack:** Oracle Cloud, Docker, Kafka, Redis, OpenCV, TensorFlow, Ollama, Python, Node.js, PostgreSQL.

Full-Stack CRUD App with Automated CI/CD & Docker Containerization [GitHub Link] [Live Demo]

- Engineered a complete DevOps-first application from conception to production.
- Implemented fully automated deployment pipeline using GitHub Actions, Docker, and Oracle Cloud Infrastructure. Every git push triggers containerized builds, registry pushes, and cloud deployment without manual intervention.
- **Tech stack:** Oracle Cloud, Docker, GitHub Actions, Nginx, Node.js, Express.js, PostgreSQL, React.

Multi-Buyer & Vendor E-Commerce Platform [GitHub Link] [Live Demo]

- Built a full-stack e-commerce app with multi-role support (Buyer, Vendor) using 3-tier architecture.
- Implemented authentication, order management, and REST APIs with Node.js and Express.js.
- **Tech stack:** React, Node.js, Express.js, Azure SQL Database.

Serverless User Processing System [GitHub Link] [Live Demo]

- Developed a React frontend with a serverless backend using AWS Lambda triggered by API Gateway.
- Integrated DynamoDB for data storage and hosted on S3 as a static website.
- **Tech stack:** AWS Lambda, API Gateway, DynamoDB, S3, React.

TECHNICAL SKILLS

- **Programming:** JavaScript, Python, C/C++, SQL, VHDL
- **Backend & Systems:** Node.js, Express.js, REST APIs, MongoDB, SQL Server, Redis, Nginx
- **Cloud & DevOps:** AWS (EC2, Lambda, S3, DynamoDB, API Gateway), Docker, GitHub Actions, Linux, Git
- **Embedded & Hardware:** STM32, Microcontrollers, FPGA (VHDL), Embedded Systems
- **Concepts:** Messaging Systems (queues, pub/sub), basic distributed systems understanding
- **Tools:** VS Code, Cursor, Claude AI, GitHub Copilot, LaTeX
